# Sulphur Boost

**Natural liquid nutrient**

- Sulphur Boost helps plant absorb sulphur more efficiently
  - Sulphur important plant nutrient
  - Builds up plants immune system
- Safe to use with beneficial insects and wildlife
  - Easy to apply as foliar application
- Treatment for powdery mildew and blackspot

**1000ml**

dragonfli

# Sulphur Boost

Natural liquid nutrient

Sulphur is an important plant nutrient and a key element in healthy plant growth, it also builds plants immune systems to several fungal diseases such as powdery mildew and blackspot. Sulphur deficiency can lead to reduce fruiting and yield loss. Sulphur Boost provides a natural liquid formulation that can be applied to many plants including roses, strawberries, peaches, vines, gooseberries, apples, plums, brassicas and ornamental plants. Easy to apply as a foliar spray and safe to beneficial insects and bees.

## Directions for use

- Shake product well before use
- For every 10 litres of water add one measure of 10-30 ml from the dosage chamber directly into your spraying equipment
- Do not exceed the maximum dose or apply in extremely hot conditions, especially under glass, as this can scorch plants
- pH should be between 5-7 and do not apply more than 7x in a growing season
  - Spray directly onto leaves of plants on the underside and top
  - Focus spray on upper part of plants
  - Store in cool place out of sunlight

## Precautions

- Wash hands after use, avoid contact with eyes and skin, do not drink or swallow
