Long Lasting Pheromone Trap

For The Monitoring & Capture Of:

Codling Moth / Pea Moth / Plum Moth / Leek Moth

Horse Chestnut Leafminer / Carnation Tortrix Moth

Pack Contents:

- 1 Re-usable pheromone trap
- 1 Species specific pheromone lure(s)

Assembly Of Trap:

1. Remove paper from yellow sticky pad and place at bottom of bucket
2. Attach the funnel to the bucket by aligning the slots on the funnel with the tabs on the bucket and twisting to lock together.
3. Attach the lid to the funnel by aligning the 4 inserts with the 4 pegs on the funnel. Push the pegs into the holes so the lid is fully attached.
4. Remove a pheromone lure from its sachet and place in the plastic cage, then fasten the cap onto the cage. Store additional lures in the fridge.
5. Push the lure cage through the hole in the lid from above so that the cage effectively hangs below the lid.
6. Thread the supplied hanging cord through the two tab-holes on the lid and tie at both ends.

How To Use:

- 1 Place traps out from the end of April until the end of October
- 1 One trap will cover over 250sqm (or one per tree if treating Horse Chestnut Leafminer)
- 1 Hang traps at 1.5m height (or within tree canopy if treating Horse Chestnut Leafminer)
- 1 Replace lures as per website directions and empty trap contents. Store additional lures in the fridge or freezer until required

Cap
