Clothes Moth Egg Killer Sachets

Application Instructions

Please use immediately upon receipt

Required conditions:

- Temperature range: **15-35°C**
- For inside use only
- Do not apply the sachets if insecticides have been used in the past 1-2 weeks

Before application:

- Do not open the sachet. The sachet already contains a small emergence hole

Application:

- Place the sachets in drawers, at the bottom of wardrobes, on top of clothing, or on carpets with suspected infestations
- Place the sachets down horizontally and avoid blocking the emergence hole
- Do not place objects on top of sachets as you may damage the pupae inside
- Place the sachets low as the adult wasps tend to fly upwards
- One sachet can treat an area of up to 25 square metres

Next Steps:

- Observe Clothes Moth pest levels over the next 3 weeks and consider applying more *Trichogramma* if Clothes Moth larvae populations remain high
- Replace your sachets after 3 weeks
- Use our Clothes Moth Pheromone Traps to catch male adult moths; reducing mating and egg laying

Clothes Moth Pheromone Trap Application Instructions

Required conditions:

- For indoor use only

Before application:

- If you are using our Moth Egg Killer Sachets, ensure the trap is set up at the opposite end of the room so the parasitic wasps do not get stuck in the trap
- Keep any unopened pheromone lures in the fridge or freezer when not required

Application:

- Push the trap together to form a tent-like structure, and peel off the paper inside to reveal the sticky surface
- Open the foil lure sachet, remove the pheromone lure and place it inside the trap
- The male Clothes Moths will then be lured into the trap by the pheromone and caught on the sticky pads inside
- You can hang the trap in wardrobes, place in large drawers, and position under beds (if natural carpets are present)

Next Steps:

- To keep the trap active, replace the first pheromone lure after six weeks and use the second lure provided. The trap is supplied with the two lures to provide you with a 12 week catching period
- We strongly recommend combined use of Clothes Moth Traps and our Moth Egg Killer Sachets to ensure Clothes Moths are being controlled at both adult and egg life cycle stages
