Clothes Moth Pheromone Trap Application Instructions

Required conditions:

- For indoor use only

Before application:

- If you are using our Moth Egg Killer Sachets, ensure the trap is set up at the opposite end of the room, so the parasitic wasps do not get stuck in the trap
- Keep any unopened pheromone lures in the fridge or freezer when not required

Application:

- Push the trap together to form a tent-like structure, and peel off the paper inside to reveal the sticky surface
- Open the foil lure sachet, remove the pheromone lure and place it inside the trap
- The male Clothes Moths will then be lured into the trap by the pheromone and caught on the sticky pads inside
- You can hang the trap in wardrobes, place in large drawers, and position under beds (if natural carpets are present)

Next Steps:

- To keep the trap active, replace the first pheromone lure after six weeks and use the second lure provided. The trap is supplied with the two lures to provide you with a 12 week catching period.
- We strongly recommend combined use of Clothes Moth Traps and our Moth Egg Killer Sachets to ensure Clothes Moths are being controlled at both adult and egg life cycle stages.
