DRAGONFLI

SMALL GARDEN LEATHERJACKET KILLER NEMATODES - APPLICATION INSTRUCTIONS

REQUIRED CONDITIONS:

- Soil temperature must be above 10°C
- Better results can be expected if lawns have been scarified and tined before application
- Do not apply the nematodes in bright sunshine as nematodes are U.V sensitive
- Ensure the lawn is watered and moist before applying nematodes

APPLICATION:

- Open sachet and empty entire contents into a bucket of **1L** of lukewarm water
- Stir thoroughly to break up and dissolve carrier material
- Add 0.5L of the nematode concentrate to a watering can with up to **10L** of water
- One pack of 20sqm nematodes will make **2 watering cans** (including concentrate solution)
- Apply to lawns using a coarse rose / nozzle
- Each watering can treats up to 10sqm
- Use of all the contents of the pack once opened. Made up solution cannot be stored
- The nematodes can also be applied with some hose end feeder / nematode applicators & sprayers such as our **Nema Super Sprayer**

STORAGE:

- If you cannot apply immediately, store in the fridge (4°C) and use as soon as possible
- Do not freeze the nematodes

NEXT STEPS:

- Continue to keep the lawn moist for 2 weeks after application
- Repeat applications may be required for severe infestations
- To repair damaged turf apply our **Lawn Grub Repair Boost** biostimulant
