**Moth Egg Killer Sachets (*Trichogramma evanescens*) - Clothes moth control**  
**application instructions**

**Please use immediately upon receipt**

**Required conditions:**

- Temperature: between 15 and 35°C
- For inside use only
- Insecticides: Do not apply *Trichogramma* if insecticides have been used in the past 1-2 weeks

**Before application:**

- Do not open the sachet. The sachet already contains a small emergence hole

**Application:**

- Place the sachets in drawers, at the bottom of wardrobes, on top of clothing, and on carpets suspected to be infested with Clothes Moth
- Place the sachets down horizontally and avoid blocking the emergence hole
- Do not place objects on top of sachets as you may damage the pupae inside
- Place the sachets low as the adult wasps tend to fly upwards
- One sachet can treat an area of up to 25 square metres

**Next Steps:**

- The tiny *trichogramma* parasitic wasps will emerge over a 2-4 week period
- Observe Clothes Moth pest levels over the next 3 weeks and consider applying more *Trichogramma* if Clothes Moth larvae populations remain high
- Remove your sachets after 4 weeks

## Clothes Moth Pheromone Trap Instructions

Clothes Moths (*Tineola bisselliella*) can cause serious damage to clothes, garments and curtains. Clothes Moth larvae create a webbing around material and then consume the inner contents, making holes and shredding clothes and fabrics. Adult moths prefer warm, dark places such as closets and cupboards.

### **Required conditions:**

- For indoor use only

### **Before application:**

- If you are using our Moth Egg Killer Sachets, ensure the pheromone trap is set up at the opposite end of the room, so the parasitic wasps do not get stuck in the trap
- Keep any unopened pheromone lures in the fridge or freezer when not required

### **Application:**

- Push the trap together to form a tent-like structure, and peel off the paper inside to reveal a sticky surface
- Open the foil lure sachet, remove the pheromone lure and place it inside the trap
- The male Clothes Moths will then be lured into the trap by the pheromone and caught on the sticky pads inside
- You can hang the trap in wardrobes, place in large drawers, and position under beds (if natural carpets are present)

### **Next Steps:**

- To keep the trap active, replace the first pheromone lure after six weeks and use the second lure provided. The trap is supplied with the two lures to provide you with a 12 week catching period.

**We recommend you combine use of your Clothes Moth Traps with our Moth Egg Killer Sachets to ensure Clothes Moths are being controlled at both their adult and larvae life cycle stages.
