House Plant Boost

Liquid organic fertilizer for House Plants

- Ready to use
- Spray onto leaves
- Made from plant extracts
- Improves plant health
- Stimulates growth

House Plant Boost is a compound organic fertiliser (NPK 3-1-1) that is made from yeast extracts, herb extracts and humic acids. Stimulates plant growth, aids plant resistance to stress and improves overall plant health.

Directions for use

- Shake bottle before use
- Spray/mist onto leaves
- Apply every 2 weeks
- Can be used all year round
- Store frost free
- Use within one year

Precautions

- Keep out of reach of children
- Avoid contact with eyes
- Do not drink or swallow
- Rinse hands after use

Fungus Fly Killer

10m² & 20m² Nematode Packs

- Nematodes for the treatment of Fungus fly larvae (Fungus gnats, Sciarid fly larvae)
 - For application to soil & compost
- Packs contain live nematodes (*Steinernema* species)

5 Million Nematode Pack To Treat 10m²

Our live *Steinernema* species nematodes kill the larvae of Fungus fly. It is also good practice to suspend yellow sticky traps just above the infested area to catch Fungus fly adults. These are available on our website.

Directions for use:

- On receipt of pack, store in fridge (4-8°C) or apply directly
- Soil or compost temperature should be 10°C or above at application
- Soil or compost should be moist at time of application
- Do not apply in bright sunny conditions, apply in dull weather or early in the evening
- Once pack is opened, use entire contents. The pack cannot be stored once opened
- Nematodes will seek out and kill Fungus fly larvae within 14 days of use, keep compost/soil moist during this period
- Apply when Fungus fly adults or larvae are observed

How to apply:

- Open pack and empty entire contents into a bucket of 0.5 litre of lukewarm water
- Mix and break up any lumps. This ensures even distribution of nematodes in solution
- Take 0.5 litre of solution and add to watering can with up to 10 litres of clean water
- One pack will make 1 watering can (including concentrate solution)
- Apply to pots, seed trays, or open beds using a coarse rose/nozzle
- One watering can treats up to 10 square metres, and up to 25 house plants in 40cm pots
- Water area/pots treated after use and keep moist for a week after application
- Repeat application, if required, every four weeks until no more Fungus fly larvae are present
- Use all the solution when applying to your soil or compost, do not store the solution

10 Million Nematode Pack To Treat 20m²

Our live *Steinernema* species nematodes kill the larvae of Fungus fly. It is also good practice to suspend yellow sticky traps just above the infested area to catch Fungus fly adults. These are available on our website.

Directions for use:

- On receipt of pack, store in fridge (4-8°C) or apply directly
- Soil or compost temperature should be 10°C or above at application
- Soil or compost should be moist at time of application
- Do not apply in bright sunny conditions, apply in dull weather or early in the evening
- Once pack is opened, use entire contents. The pack cannot be stored once opened
- Nematodes will seek out and kill Fungus fly larvae within 14 days of use, keep compost/soil moist during this period
- Apply when Fungus fly adults or larvae are observed

How to apply:

- Open pack and empty entire contents into a bucket of 1 litre of lukewarm water
- Mix and break up any lumps. This ensures even distribution of nematodes in solution
- Take 0.5 litre of solution and add to watering can with up to 10 litres of clean water
- One pack will make 2 watering cans (including concentrate solution)
- Apply to pots, seed trays, or open beds using a coarse rose/nozzle
- Each watering can will treat up to 10 square metres. The entire solution can treat up to 50 house plants in 40cm pots
- Water area/pots treated after use and keep moist for a week after application
- Repeat application, if required, every four weeks until no more Fungus fly larvae are present
- Use all the solution when applying to your soil or compost, do not store the solution
