SMALL GARDEN BOX TREE CATERPILLAR KILLER
NEMATODES - APPLICATION INSTRUCTIONS

REQUIRED CONDITIONS:

- For best results apply when Box Tree caterpillars are present on plants
- Apply on dull, wet days. Avoid applying on bright days, as nematodes are U.V sensitive
- Humidity and moisture aids nematode activity on surface areas. Apply early or late in the day when humidity levels at highest. Avoid frosty conditions
- Clean spraying equipment and do not apply with insecticides
- Apply second application 7 days after first treatment

APPLICATION:

- Open sachet & empty entire contents into a bucket of 1L of lukewarm water (store un-opened sachets in the fridge)
- Stir thoroughly to break up and dissolve carrier material

IF APPLYING WITH A NEMA SUPER SPRAYER:

- Pour 500ml of the concentrate into the Nema Super Sprayer and proceed to follow the sprayer instructions
- Spray solution from bottom to top, making sure that the middle of the Box hedge gets plenty of spray solution and ensuring good coverage of Box Tree caterpillars
- Use all contents of pack once opened. Made up solution cannot be stored
- Repeat instructions for the second nematode sachet application, 7 days after the first

IF APPLYING WITH A WATERING CAN:

- Add 500ml of the concentrate to a watering can with up to 10L of water
- One pack of 10million nematodes will make 2 watering cans
- Apply to Box plants using a coarse rose/nozzle
- Each watering can treats up to 7sqm
- Use all contents of pack once opened. Made up solution cannot be stored
- Repeat instructions for the second nematode sachet application, 7 days after the first

NEXT STEPS:

- Ensure thorough coverage of nematodes is sprayed directly over the caterpillars
- Check for any new caterpillars and repeat treatment if required
