DRAGONFLI

SMALL GARDEN CATERPILLAR KILLER NEMATODES -  
APPLICATION INSTRUCTIONS

REQUIRED CONDITIONS:

- For best results apply when caterpillars are present on plants
- Apply on dull, wet days. Avoid applying on bright days, as nematodes are U.V sensitive
- Humidity and moisture aids nematode activity on surface areas. Apply early or late in the day when humidity levels at highest. Avoid frosty conditions.
- Clean spraying equipment and do not apply with insecticides.

APPLICATION:

14SQM (1 SACHET):

- Open sachet & empty entire contents into a bucket of 1L of lukewarm water
- Stir thoroughly to break up and dissolve carrier material

IF APPLYING WITH A NEMA SUPER SPRAYER:

- Pour 500ml of the concentrate into the Nema Sprayer and follow sprayer instructions
- Spray solution ensuring good, thorough coverage of the caterpillars
- Use all contents of pack once opened. Made up solution cannot be stored

IF APPLYING WITH A WATERING CAN:

- Add 500ml of the concentrate to a watering can with up to 10L of water
- One pack of 10million nematodes will make 2 watering cans
- Apply to plants using a coarse rose/nozzle
- Each watering can treats up to 7sqm
- Use all contents of pack once opened. Made up solution cannot be stored

28SQM (2 SACHETS):

- Apply each of your two sachets following the above application instructions

NEXT STEPS:

- Ensure thorough coverage of nematodes is sprayed directly over the caterpillars
- Check for any new caterpillars and repeat treatment if required
